Round Table 9 – From Principles to Action: Ethical AI Agents  
IMTAI Manifesto Launch and Policy Dialogue. 16 ottobre 2025, ore 17:25**

Dear colleagues,

We are pleased to announce that IMTAI will be a key player at **ComoLake2025** with a major international event: **Round Table 9 – From Principles to Action: Ethical AI Agents**, scheduled for **October 16 at 5:25 PM**.

After months of interdisciplinary work, with the contribution of about **200 experts from over 15 countries**, the **IMTAI Manifesto** will be officially launched. This document consolidates the shared principles for the classification, evaluation, and responsible governance of AI agents.

The event will not just be a presentation, but a **political and operational dialogue**. Specifically:

- the **ethical and governance principles** already developed by IMTAI will be discussed;
- **guidelines for policymakers and international institutions** will be proposed, with the aim of moving from theory to action;
- the foundations will be laid for a **global regulatory framework**, capable of balancing innovation, security, and the protection of fundamental rights.

Round Table 9 marks a crucial milestone: the transition “**from principles to action**”, where research, industry, and institutions will come together to transform ethical principles into **concrete international recommendations**.

Best regards,

On behalf of the IMTAI Coordination Team
